End Location	1S PAGOSA SPGS
End Lat/Lon	37.25/-107.02
Deaths Direct/Indirect	0/0 (fatality details below, when available...)
Injuries Direct/Indirect	0/0
Property Damage	1K
Crop Damage	
Episode Narrative	A tornado touched down in a forested area near Pagosa Springs and ripped out large pine trees along a quarter mile path which was about 100 yards in width. Trees falling on power lines knocked out electricity for most residents in Archuleta County for about 1.5 hours. This was the first documented tornado in Archuleta County.

Event Map:

Note: The tornado track is approximate based on the beginning (B) and ending (E) locations. The actual tornado path may differ from a straight line.
